PLS 2003: Introduction to Political Research
Spring 2002

Assignment 4: Creating an SPSS Data Set
(10 points)

Locate an existing data set (either in print form or on the Internet). Make sure to attach the print data set or a print-out of the Internet data set to the assignment. Using these data, create an SPSS data file. The file must include five variables and ten cases of each variable. Make sure to appropriately label the variables. Save the file as an SPSS data file, and turn in the assignment on a disc.
